Florida Renewable Energy Association Hosts Educational Seminar in Support of the World's Largest Grassroots Solar Event

To help Florida residents cut energy costs & assert energy independence, home owners, solar enthusiasts and businessmen statewide are participating in the educational seminar 'Solar Power: Before & After the Storm'

Florida, October, 2017 – Florida Renewable Energy Association (FREA) and solar-savvy individuals, installers and grassroots organizations throughout Florida are participating in the Educational Seminar – Solar Power: Before & After the Storm. This multi-part seminar about solar energy will discuss how solar energy came to the rescue during power outages after Hurricane Irma. Learn about how solar-electric power works and solar emergency backup power keeps critical items powered during utility outages. This seminar is in conjunction with the FREA-ASES 22nd Annual National Solar Tour of Homes and Business, the world's largest grassroots solar event.

Bill Young with FREA and Ray Osborne with AIA will present the seminar on Tuesday, October 24 (see details below). The seminar showcases solar technologies your neighbors are using to reduce monthly energy bills and maintain electrical power during storms. Information about home improvements designed to weather storms will be presented by Lawrence Maxwell, Space Coast Architects.

"The Educational Seminar explains an array of practical and economical solutions available right here, right now."

Bill Young, President, FREA

Seminar and Tour Details:

The seminar and solar tour are free. The seminar is open to the public at the Community Room of the Cocoa Beach Public Library on Tuesday, October 24 and will start at 6 pm. The library is located at 550 North Brevard Ave., Cocoa Beach, Florida. There is a video on twitter @Ray_Osborne.

Also, on **October 21**, and **October 28**, FREA will sponsor 25 open house sites of solar-powered homes and business in Florida. See www.cleanenergyflorida.org for times and locations.

ABOUT THE FLORIDA RENEWABLE ENERGY ASSOCIATION:

FREA is a non-profit organization that promotes the development of clean energy in Florida through public education, technology advancement, public outreach, advocacy and industry networking opportunities. Members work with industry, government and other like-minded non-profits in providing seminars on energy efficiency, solar energy and alternative fuel vehicle technologies to promote a sustainable world. FREA is the Florida chapter of the American Solar Energy Society.
