

SUSTAINABLE SOLAR POWER SYSTEMS for Comfort, Resiliency and Survival

EPS-102
At the
Florida Solar Energy Center
A Research Institute of the
University of Central Florida

FREE!

Who Should Attend?

General public, home owners, landlords, solar industry, school administrators, facilities personnel, electricians, architects, code officials, building inspectors and emergency managers.

When? Wednesday, October 3, 2018 2:00 - 5:15 pm

AGENDA

1:30 - 2:00	Registration
2:00 - 2:15	Welcome and Introductions
2:15 - 3:00	Affording Solar is Easier Than You Think
3:00 - 3:45	Solar Energy, Equipment and Codes
3:45 - 4:00	History of Using Solar in Disasters and Emergency Power
4:00 - 4:30	Resilient Home is a Solar Home
4:30 - 5:00	FSEC and PV System Code Requirements
5:00 - 5:15	FSEC, ASES and FREA Closing Comments and Questions
5:15 - 6:00	Solar Tour of FSEC

What You Will Learn

Gain an understanding of solar electric system basics, codes, maintenance and operation and how it can be used to make your home, school or business disaster ready, more comfortable and safe without breaking the bank.

Where?

Florida Solar Energy Center (FSEC)
1679 Clearlake Road
Cocoa, FL 32922

Presenters:

Bill Young, Instructor, retired FSEC project manager with over 20 years of experience in solar energy and disaster response.

John Sherwin, PV Program Director at FSEC with over 20 years of experience

Doug Coward, Solar and Energy Loan Fund (SELF) manager with over 10 years of experience.

Susan Schleith, Instructor at FSEC, education manager with over 20 years of experience in solar and energy education.

Registration:

Please Register on Eventbrite or like us on Facebook. **Event is Free.** Walk-ins welcome.
